

PROPOSITION

In today's session I have learned about Boolean principles and I understood the difference between proposition statement and fact, opinion, Question statement . And I understood the how proposition differs from others like fact is an some kind of proposition statement but it always claims true But the proposition statement always it must be in the form of either it can be true or false.

INTERFACE

Learned how interface will create an environment that allows the humans to communicate with machines not only computer it works in every machines or platform we are using in our day to day life.

I have learned about terminal it is an one kind of interface how to create an file through the command prompt directly and about the commands and keywords use to create and operate a file and it is used by user to give command to computer.

Today I had worked on git it provides an environment to monitor our work on our project and saves them in repository and learned how to push an file in our system in our git hub account. It allows to store all the work done by team for the project to store in a single repository and everyone can view all the work.
